JSAT Corporation

JSAT to Exhibit at CommunicAsia 2008
*Asia's Premier International Communications
and Information Technology Exhibition*

JSAT Corporation (Head office: Minato-ku, Tokyo; President and CEO: Kiyoshi Isozaki; "JSAT") will run a booth at CommunicAsia 2008, one of the Asia's largest international communications and information technology exhibitions, following on from the previous fiscal year. The event is being held for four days from June 17 (Tuesday) through June 20 (Friday) at the Singapore Expo in Singapore.

JSAT has become a satellite operator under the SKY Perfect JSAT Corporation Group, a holding company formed through the integration of JSAT and SKY Perfect Communications Inc. in April 2007. In March this year the group acquired Space Communications Corporation (SCC), another satellite operator. This consolidated all of Japan's satellite operator into a single corporate group, with a total of 12 satellites in operation.

At its CommunicAsia 2008 exhibit, JSAT will present its initiatives to offer satellite communications services to the Asia region and seek to foster a broad understanding of its satellite network. It will focus on the satellite communications business of the entire SKY Perfect JSAT Group, encompassing not only JSAT satellites but also those of SCC, in order to enhance the group's presence in the Asia region.

The SKY Perfect JSAT Group will remain focused on generating new demand for satellite communications services in the Asia region. The group will further promote sales in the Asian Ku-band market with the launch of Superbird-7 planned for this summer. Having obtained partial ownership of Intelsat-15 (IS-15), scheduled for launch by Intelsat in 2009, we will roll out new services centered on the Indian Ocean region. We will also pursue initiatives through the JSAT Hong Kong Branch, which was made a full branch office last year.

Overview of CommunicAsia 2008

- ◆ Time and Date: June 17 (Tue) – June 20 (Fri), 2008 10:30~18:00
- ◆ Place: Singapore Expo
